# SKODA

## Choice and value

When we say we're driven by difference, we mean it. At Škoda, we understand that your needs are unique and varied, and that one size doesn't fit all. It's why, from hatchbacks to SUVs, combustion engines to fully electric, our award-winning range perfectly balances varied business needs and company car driver requirements. We also know you need affordability without compromise. Which is why we offer high-quality vehicles with an incredible range of standard features, to suit both your business needs and budget.

## Ready for a greener future?

We all know that getting closer to a zero-emissions fleet is a top priority. And with the multi-award-winning fully electric Enyaq range, we'll help you step towards a positive future. Beyond CO<sub>2</sub> emissions, drivers may also benefit from BIK savings. And to assist you, we have the tools to help.

## Services we believe matter to you

Whatever stage you're at, our promise is simple – to deliver the difference that makes your life easier and saves you time, even when it comes to the most challenging issues.

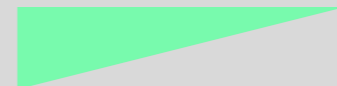

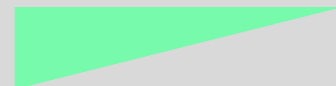

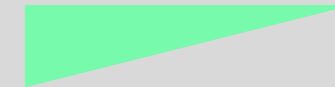

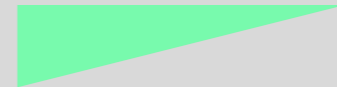

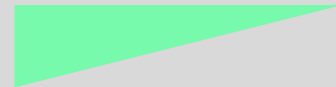

## We're here to help

Want advice on lowering your carbon footprint? Need a hand with the contract hire or leasing process? Looking for some help fine-tuning your fleet for the future? No matter how small or large your business, whether you're a company car driver, fleet manager or business decision-maker, you'll be supported by a specialist team who can help deliver, whatever your needs.

## Protecting your greatest asset – time.

And we keep things simple in other ways too. From our Live Tour virtual showroom, you can discover our cars in the way that suits you best – to tools that help you make better-informed decisions. Whether that's customising a model to suit your lifestyle, assessing if it's the right time to go electric or finding out how much company car tax you'll pay, our tools can make all the difference.

We've produced this guide to cover our entire Škoda range, so you can access the key information we think you may need in the most efficient way possible.

“If you looked up ‘easy to live with’ in the dictionary it would just be a picture of the Fabia”

# Supporting emergency services

From the multi-award-winning all-electric Enyaq range, police, fire and ambulance conversion to the Octavia, Superb and Karoq, our blue light range is designed to fit the bill in every way, whatever your challenge.

With over 100 years supporting emergency services, we understand what's important to you. That's why with Škoda, you'll find vehicles that deliver in all types of conditions, time and time again.

[Request a Blue Light demo](#)

## Is your blue light fleet ready to go green?

Rapid charging capability and an impressive electric range make the multi-award-winning Enyaq range the ideal emergency services vehicle for a whole host of duties.

## Škoda for Police

The extreme versatility, comfort and value of Škoda's emergency service vehicles ensures they are a long-standing industry favourite across UK police operations. From the specially converted Scala police car to the Kodiaq, right through to the all-electric Enyaq range, Škoda is well-positioned to meet your bespoke policing needs.

## Škoda for Ambulance

When lives are hanging in the balance, Škoda vehicles are renowned for demonstrating persistent performance and reliability under immense pressure. Whether it's the Octavia vRS that gets you to incidents safely and quickly, or the 4x4 capabilities of Kodiaq that enables access to even the most remote places, we're proud to be the manufacturer of choice for many NHS authorities.

## Škoda for Fire and Rescue

Whether it's the Škoda Kodiaq or the Karoq, our Fire and Rescue vehicles are equipped to respond to any emergency situation - be it call-outs to fires, floods or road traffic collisions. Providing practical conversion solutions combined with the latest tech and connectivity in-car features, Škoda brings valuable support to your emergency response teams - however challenging the situation.

## Škoda for protection vehicles

Škoda Armoured Superb offers ballistic and bullet-resistant protection. Virtually indistinguishable from a standard Škoda Superb Estate, the car is built from high-strength steel and bullet-resistant glass, yet still maintains its spacious five-seater cabin, large boot and luxury interior.

## 'One-stop shop'

Whether its financial options, including contract hire for added flexibility, or bespoke conversions that precisely fit your specific requirements - with breakdown recovery, service, maintenance and repair requirements built into one package - we offer a one stop shop for all your blue light needs.

The Škoda Enyaq range can help you on your journey towards a more sustainable fleet and meet your ever evolving needs, discover how on the following pages.

# How EV ready is your fleet?

We all know a good business partner when we meet one, and the fully electric Enyaq range is perfectly equipped to be yours. From reducing fuel costs to qualifying for tax breaks and further demonstrating your commitment to social responsibility, introducing the Enyaq range into your fleet makes business sense in more ways than one. However, the challenge of switching can seem like a huge undertaking. But with our support, it doesn't have to be.

When it comes to assessing your readiness for electric vehicles and making the switch, our Fleet Team and Local Business Development Managers are here to support you. Whether it's helping you measure your mileage and potential charging costs, identifying suitable vehicles or accessing charging infrastructure both at home and on the go, we can help you assess the cost impacts, so you can make the right choices.

## We give you the tools you need

From the [Škoda-iV-4-fleet](#) tool that compares electric vehicle capabilities with your own petrol or diesel car to a [fuel-saving](#) and [range calculator](#), our growing suite of online tools equips you with the knowledge you need to make the right decisions for the short and long term.

## A charging infrastructure that works

For businesses, charities and public authorities looking to install EV charging points at work, the Workplace Charging Scheme\*\* covers up to 75% of the hardware and installation costs - up to a maximum of £350 per outlet - for up to 40 outlets. To understand whether you are eligible for the workplace Charging Scheme please click [here](#).

## Helping you manage charging costs

As part of Škoda's electric solutions, we have also partnered with Octopus Energy to offer £90 of charging credit to new and existing customers who switch to a dual fuel home energy supply. That's the equivalent of up to 3,800 miles\*.

[Find out more](#)

\* New customers to Octopus Energy who purchase an Škoda electric vehicle and who set up an account for gas and/or electricity who sign up via the referral link provided by Škoda UK will be eligible for free miles in the form of £45 credit per fuel type on their energy account. To receive £90 credit, customers must switch both fuels to Octopus Energy. If only one account is switched, the customer will receive £45 credit. The credit shall be applied once the account is on supply and the first direct debit payment has been taken. If you qualify for more than one marketing incentive, Octopus reserves the right to give you just one incentive.

To benefit from the Octopus Go Green tariff, the customer must have a SMETS2 smart meter or a Secure™ branded SMETS1 meter that they have agreed to let Octopus receive half-hourly consumption data from. There are some instances where a smart meter installation is not possible, for example remote areas with poor mobile signal. Where smart meter installation is not possible, customers can sign up to an Octopus standard tariff and still receive the £45 credit per fuel type.

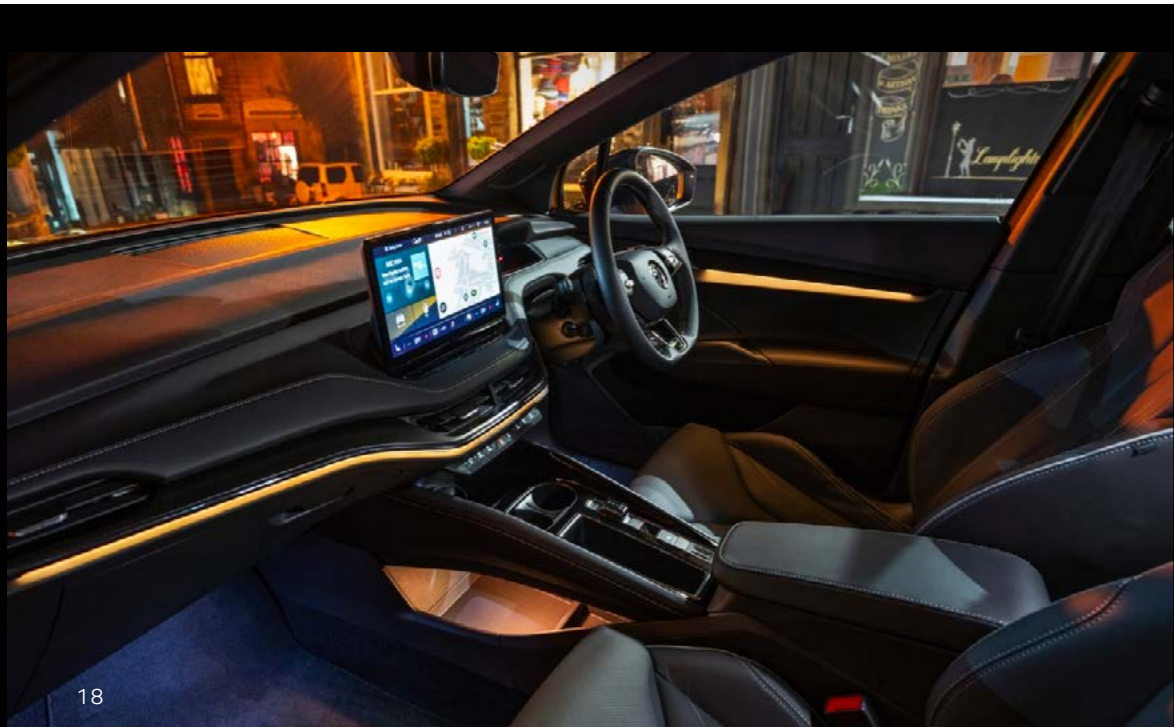

For the Škoda Enyaq 80, at Octopus' Go Green tariff off-peak rate (12 p/kWh, correct as of 4 November 2022), £90 credit is equivalent to up to 3,800 miles when the vehicle is driven purely on electric power. This is based on a usable battery capacity of 77 kWh and an electric driving range of 338 miles giving an efficiency average of 0.23 kWh/mile. Efficiency differs depending on multiple variables, such as driving conditions and vehicle configuration. If the vehicle is not charged during the off-peak window, £90 credit is equivalent to approximately 900 miles based on the peak electricity price of 42 p/kWh (correct as of 4 November 2022).

For existing Octopus customers who joined us directly can still avail this offer. However, if you joined us via our Refer a Friend scheme or through one of our partners, and have already received a joining reward, unfortunately, you're not eligible for a free miles reward. If you're a gas and electricity customer, and haven't received a joining reward from us previously, you'll receive a £90 credit. If you're only with us for one fuel type, you'll receive £45 credit. Drop us an email at [existingoffer@octoenergy.com](mailto:existingoffer@octoenergy.com) to take the offer.

\*\* Octopus Go Green is still a beta product and is subject to changes and tweaks as it is optimised and developed.

\*\*\* Fuel costs of approximately 3p/mile based on an Enyaq 80 with a usable battery capacity of 77 kWh and a driving range of 338 miles, fully charged during the cheap charging window (correct as of 4 November 2022)

\*\* From April 2022, the Office for Zero Emission Vehicles (OZEV) announced that the Electric Vehicle Homecharge scheme (EVHS) grant of £350 is only available to homeowners who live in flats & consumers in rental accommodation (flats and single-use properties). Our partner Pod Point can advise if you are eligible and will support you through the grant application process. The Government grants are subject to full terms and conditions and eligibility may be revised or withdrawn at any time without prior notice. UK sales only (excludes Channel Islands and Isle of Man). See <https://www.gov.uk/government/publications/customer-guidance-electric-vehicle-homecharge-scheme/electric-vehicle-homecharge-scheme-guidance-for-customers> for further information. The WCS is open to businesses, charities and public sector organisations that meet the applicant and site eligibility criteria. See Workplace Charging Scheme: guidance for applicants - GOV.UK ([www.gov.uk](http://www.gov.uk)) for further information.

# Škoda Powerpass

## Charge with just one card practically anywhere

Charging will be a big aspect of your EV ownership, so it's good to know that with Powerpass you have access to over 17,000 public charge connectors across the UK – with just one card. This also includes 6,630 chargers in the bp pulse charging networks, so you can fit charging effortlessly into your day-to-day life. Additionally, the Powerpass will provide you with access to the expanding IONITY fast charging network across Europe as well.

Once the selected tariff has been activated, the Škoda Powerpass offers standard market prices as well as transparent and convenient monthly invoices.

And to make things even easier, you'll also be able to see all your charging data and payments, neatly, in one app.

- › **Three flexible, transparent charging tariffs**
- › **Access to charging networks from almost all operators**
- › **Charge with just one card practically anywhere**
- › **Fast charging with IONITY**
- › **Ready for Plug & Charge**

Take advantage of the subsidised packages available for Enyaq range customers in the first 12 months<sup>^</sup> of ownership, as summarised below:

- › **Charge Free tariff at £0 per month<sup>^</sup>**
- › **Simply Charge at £4.99 per month<sup>^</sup>**
- › **Charge Faster at £13.99 per month<sup>^</sup>**

To learn more, click [here](#).

For full Terms and Conditions please click [here](#).

## Getting started with Powerpass is easy

Simply follow these 3 steps, and then you can start charging with Powerpass.

### Step One

#### Download the app

Use the QR code.

Or use one of the links below.

**App Store (iOS) - [Click here](#)**

**Google Pay (Android) - [Click here](#)**

### Step Two

#### Order your card

In the Powerpass app, fill in your personal data, select the charging tariff that best suits your needs, then order your card.

### Step Three

#### Pair your Powerpass

Once you receive your card, simply pair it with your account in the Powerpass app.

The Ohme logo is displayed in white on a red brick wall. It features a stylized 'O' with a horizontal line through it, followed by the letters 'hme'.

# Ohme

## Get the right start for your electric journey

If you'd like the convenience of a smart home charger that minimises the impact on energy bills, a smart charger through our preferred home wallbox supplier Ohme, might be the right opportunity for you.

## Smart charge with Ohme

Our partnership with Ohme will help make the switch to electric easier and save money by charging when prices are lower and when renewable energy generation is at its highest.

You can find more information here:  
<https://ohme-ev.com/partner-skoda>

## Maximise savings

If you have a time-of-use tariff or a variable tariff from a provider such as **Octopus Energy**, Ohme uses your tariff information to charge at the cheapest times. This means you can take advantage of reduced costs without having to remember when to plug in.

## Minimise carbon footprint of electricity use

The Ohme server communicates with the grid which allows you to charge using electricity with a low carbon intensity which can help reduce the carbon footprint.

## Remote management

You can also start, stop or schedule charges so you can get on the road faster, and even set a price cap with the Ohme app.

## Release pressure from the grid

Ohme adjusts energy intake according to peaks and lows in demand. Smart EV charging in periods of low demand helps balance the grid and save you money, as energy suppliers generally offer cheaper electricity during off-peak hours.

## Charge your car for less with Ohme

Our smart tech helps you charge at the cheapest and greenest times, so you can save money whilst doing your bit for the environment. Discover the options.
