Pricing valid as of 1st April 2025.

All prices listed are Manufacturer's 'On The Road' Recommended retail Price. Skoda may change prices at any time (this includes where there are government changes in regulation and/or legislation). There may be a delay to any RRP displaying correctly on our materials. Always obtain prices from your chosen Retailer. Images shown do not reflect the stated entry level prices.

In order to preserve the usable capacity of the battery as much as possible, it is recommended to set a charging target of 80% for daily operation and use (which can be switched to 100% before long distance journeys for example).

The availability of the maximum electrical output could be limited. The amount of power available in individual driving situations depends on various factors, such as ambient temperature and the charge status, temperature and condition or physical age of the high-voltage battery.

From 1st April 2021 zero emission electric vehicles (BEVs) are zero-rated standard tax for both the first year and all subsequent years.

Information regarding tyre technical specifications can be found by visiting the Škoda car configurator here.

М	over 255	£5,490	£5,490

OTR (On The Road)

Recommended 'On The Road' prices include delivery, 12 months Road Fund Licence, DVLA First Registration Fee and apply to the UK only.

VED (Vehicle Excise Duty)

All vehicles will be subject to Vehicle Excise Duty based on the fuel type of the vehicle and its carbon dioxide (CO_2) emissions level, measured in grams per kilometre (g/km). Due to changes in vehicle emissions data, CO_2 figures may differ on these vehicles if taken from current Škoda UK stock.

Vehicle Excise Duty (VED) is correct at time of publication, but this may alter to reflect any change in the applicable VED rate.

Note: Vehicles with a list price exceeding £40,000 (including factory installed options, delivery charge, number plates and VAT) will pay an additional £410 plus the standard rate VED from year 2 to, and including, year 6. After the 6th year only the standard rate VED will apply.

Pricing valid as of 1st April 2025.

All prices listed are Manufacturer's 'On The Road' Recommended retail Price. Skoda may change prices at any time (this includes where there are government changes in regulation and/or legislation). There may be a delay to any RRP displaying correctly on our materials. Always obtain prices from your chosen Retailer. Images shown do not reflect the stated entry level prices. The availability of the maximum electrical output could be limited. The amount of power available in individual driving situations depends on various factors, such as ambient temperature and the charge status, temperature and condition or physical age of the high-voltage battery.

Benefit in	Kind	example	e
------------	------	---------	---

Based on

Enyaq SE L 60 63kWh 150kW

P11D value		£38,945.00
Company car BiK tax based on CO ₂ emission level		3%
Taxable BiK (for 2025/26 tax year):	3% of £38,945.00	£1,168.35
Annual company car tax (2025/26)		
20% income tax	20% of £1,168.35	£233.67
40% income tax	40% of £2,33.67	£467.34
Monthly company car tax (2025/26)		
20% income tax	£233.67 divided by 12 months	£19.47
40% income tax	£467.34 divided by 12 months	£38.95

Company car tax is based on the vehicle's carbon dioxide (CO_2) emissions. The higher the emissions, the higher its tax liability. When a company car is made available for private use a 'Benefit in Kind' value is calculated for tax purposes. The table above will help you calculate your tax liability.

P11D (expenses and benefits)

The P11D value is calculated by taking the On The Road (OTR) price for the vehicle, less the Road Fund Licence (RFL) and First Registration Fee (FRF).

BiK (Benefit in Kind)

The BiK percentage value is based on the CO₂ emissions of the vehicle for the current tax year 2025/26.

Revolutionary design

The new Enyaq sits as the halo of the Škoda brand. A muscular and powerful design that commands respect. Showcasing a distinctive approach that makes the Enyaq a visually pleasing experience inside and out.

To stand out from the crowd, the new Enyaq's body is complemented by lower bumpers in unique dark chrome.

As well as the traditional SUV body style, the new Enyaq is also available as a sleek Coupé, adding dynamic sports bumpers and a full panoramic glass roof.

Split headlights

While the daytime running lights extend out from the Tech-Deck Face, the Matrix LED headlights sit lower, incorporating seamlessly into the air curtains to create a harmoniously designed front end. The innovative lights are as functional as they are stylish. The matrix function blanks out other road users and adapting their light output and positioning to automatically suit each driving situation: City, Country, Highway, All-weather and Tourist (when driving in left-hand drive countries).

Animated indicators

The new Enyaq is as eye-catching at the rear as it is at the front, with the crystalline design turning the rear lights into shining jewels. The animated indicators scroll effortlessly, as well as providing a welcome and goodbye animation when approaching or leaving your car.

Additional information

Purposeful creation

Tech-Deck Face

The beautiful design of the new Enyaq deserves all the attention. As such, the Tech-Deck Face incorporates and hides many of the driver assistance sensors, ensuring they do not distract from the front of the car.

The illuminated strip adds a subtle element of eye-catching style that extends seamlessly in from the LED daytime running lights.

The most aerodynamic vehicle in Škoda's modern portfolio

To maximise the distance you can travel, the new Enyaq boasts the most efficient and drag resistant design of any modern Škoda, allowing it to effortlessly glide through the air. The Enyaq Coupé achieves a drag coefficient of just 0.229, thanks to its sleek roofline, sculpted air intakes and aero-optimised wheels.

Commanding structure

Taking a strong stance on the road, the new Enyaq demands attention from every angle. The vertical slats of the lower air intake create a strong, bold look, helping the Enyaq look planted on the road.

- 11	ı	u		U	d	u	L	u	U	ų

Blind spot detection

An extra set of eyes on the road that monitors the blind spots allowing you to manoeuvre safely. An acoustic warning will also sound if the vehicle's door is opened that could collide with a vehicle, cyclist, pedestrian or electric scooter.

Park assist

This function removes the stress of bay and parallel parking by identifying if the parking spot is big enough before automatically steering into the space.

Turn assist

When the vehicle is turning, sensors in the front of the vehicle detect oncoming vehicles and brakes if needed to prevent a head-on collision.

Lane assist plus

Helping you stay in the intended lane of travel, lane assist plus uses a camera to detect road markings, and supports steering if you veer too close to the edge.

Predictive adaptive cruise control

Control your speed automatically with predictive adaptive cruise control, which uses the radar in the front grille to maintain a constant distance from the vehicle in front at speeds of 15mph or more. It also uses traffic sign recognition and GPS technology to adjust the cruise speed when necessary - typically before a turn or roundabout, or when entering an area with a lower speed limit.

Remote air conditioning

Your new Enyaq, your way. That's the beauty of remote air con, which lets you schedule the car to be air conditioned at a specific time, so you'll always head off in absolute comfort.

Smart Schedules

Take full control of your charging schedule with this brand-new service. In addition to enabling you to take advantage of cheaper off-peak electricity tariffs, you can also create different charging settings based on the car's location, for example home or work. Just plug in the car and leave the rest to Smart Schedule.

This clever service also allows you to set the temperature before you jump in the car, ideal for chilly winter nights or hot summer days.

eCALL

In the event of an emergency on the road, the new Enyaq will automatically send an SOS signal for help to give you extra peace of mind. This is triggered as soon as the airbag or belt tensioners report a major accident.

Alternatively, you can press the manual SOS button to call the emergency services directly to report an accident or raise the alarm about another traffic incident you've witnessed.

Digital Cockpit

The new Enyaq showcases electric innovation at every turn. Dashboard included. Forget old-fashioned dials, here you'll find a full-colour Digital Cockpit featuring a range of display layouts that can be toggled via the steering wheel. These include Basic, Navigation, Assist Systems, and Goodbye View.

Head-up Display

Cleverly designed to avoid distraction, the augmented reality head-up display shows key driving data in a way that's easy to absorb at a glance.

Virtual driving information, such as speed, navigation, and adaptive cruise control, is shown directly on the road in front of the vehicle, allowing you to stay informed while staying in full control.

Models shown are not UK specification. Some of the equipment shown is optional.

Connectivity

Little touches with large impact

The Enyaq boasts a collection of thoughtful features and smart storage spaces that make everyday that little bit easier.

Umbrella storage compartment

Never let a soggy day dampen your spirits again with this handy driver's door compartment. Designed to fit the original Škoda umbrella, it also cleverly drains water away from the car. Plus, the umbrella incorporates sustainable materials into its design.

Rear storage

Plenty of spaces to put all those little nicknacks, water bottles, magazines and your phone.

Sunblinds

Keep the sun out of yours and your children's eyes with manual sunblinds for the rear windows.

Maximum space, added practicality

Net programme

This set of nets reliably prevents your items from moving around, so they're just as you left them, even after a brisk trip down a winding road.

Remote folding seats

The rear seats can be folded down using a remote release button in the boot, so you don't need to go round to the back seats.

Tow bar

The Enyaq can be equipped with a foldable tow bar with electric release via a switch is in the luggage compartment.

Loft Design Selection

The second you take your seat you'll feel at home. It's not a coincidence, as the timeless combination of grey and black is inspired by a stylish living room, as are all the interior Design Selections. Practicality and durability reign supreme, with easy to clean materials used throughout.

Ambient lighting

Customise the interior look of your Enyaq even further with adjustable ambient lighting. With the ability to match the orange seatbelts of the Lodge design selection, or the mint green piping of the Lounge design selection, or any colour you prefer.

Storage

There's space for everything in the Enyaq. Complementing the large boot is a range of clever storage spaces, including under the central armrest, next to the drive selector, and in the felt-lined door bins.

ntr			

• • • • •

Lodge Design Selection

Created for those seeking a bolder look, the Lodge design selection incorporates two-tone materials throughout the cabin, ensuring your Enyaq truly stands out from the crowd.

Unique materials

The Lodge interior features a special material called Technofil, which is composed of 75% ECONYL® fibres and 25% polyester. ECONYL® yarns are made from recycled nylon waste, such as fishing nets, fabric scraps and carpets destined for landfill. All together this gives seat upholstery a sustainabilityfocused and unique feeling interior.

Orange accents

Add a splash of colour with orange seatbelts and stitching, capturing attention and making your family want to jump in.

۱r				

.

Lounge Design Selection

You'd struggle to find a more fitting name for this design selection than Lounge. After all, everything about this strikingly detailed interior has been crafted to make you and your passengers simply want to sit back and relax.

Soft materials

Supported by grey artificial leather, the seats and dashboard are upholstered in grey microsuede. Providing the driver and passengers with a soft, comfortable place to cover many miles.

Mint green piping

Complementing the grey interior is a series of mint green piping that flows over the seats, providing a subtle burst of colour.

.

From the elegant décor to the artificial

leather door inserts and black floor mats with cognac piping, this interior denotes quality and elegance.

*The seat upholstery consists of a combination of genuine and synthetic leather. The seat cushion, centre panel and backrest of the front row seats and the seats on the left and right of the second row are made from genuine leather.

Mirroring the Suite Black design selection, the cognac alternative offers a touch of classicism and refinement that elevates the cabin.

SportLine Design Selection

The Enyaq SportLine is as dynamic inside as it is on the outside. Settling into the microsuede and artificial leather front sports seats, you instantly feel ready for action. Surrounded by carbon-effect decor, SportLine's intentions become very clear: high-powered aesthetics coupled with spirited all-wheel drive performance.

Sports focus

A range of unique interior features support a dynamic driving experience. Black microsuede and artificial leather* sports seats keep you cocooned through the corners, whilst providing a comfortable base for long journeys. Aluminium pedals and carbon-effect décor enhance the powerful look, and make the Enyag SportLine feel even more special.

3-spoke sports steering wheel

The three-spoke leather heated sports multifunction leather sports steering wheel comes as standard and allows numerous vehicle functions to be controlled from its user-friendly buttons and knurled wheels. The leather-covered steering wheel rim features black stitching, while the lower spoke has a badge bearing the SportLine lettering.

Additional information

Area view

Gain an eye in the sky when parking. Area view gives you a 360 degree view around your car, helping to prevent collisions when parking.

Head-up display

Have key driving information such as your speed, map directions and road speed limit shown to you, all whilst keeping your eyes on the road ahead.

CANTON sound system

Set the perfect tone for every journey with this set of 12 speakers and digital equaliser. Created in collaboration with German audio experts CANTON, you can be confident every album, radio show or podcast will be pitch perfect as the system has been fine-tuned to suit the Enyaq's interior.

Models shown are not UK specification. Some of the equipment shown is optional. Please note: Some combinations of options can cause the vehicle to be unbuildable. Please speak to your local **Škoda Retailer** or visit **Škoda.co.uk** to configure your required specification.

Remote park assist

Somebody parked too close to you? You can navigate your Enyaq out of a parking space remotely via the MyŠkoda app. Not only can you move the car forwards and backwards, but also into familiar parking spaces with remote trained parking.

Dynamic chassis control

Customise your Enyaq's handling to your personal preferences in any situation, be it additional comfort or dynamism.

Electrically adjustable passenger seat with massage function

Extend the comfort of an electric seat with massage to the front passenger as well as the driver.

Figures shown are for comparability purposes; only compare fuel consumption, CO₂ and electric range figures with other vehicles tested to the same technical procedures. These figures may not reflect real life driving results, which will depend upon a number of factors including the accessories fitted (post-registration), variations in weather, driving styles, vehicle load and the starting charge of the battery. Figures for battery electric vehicles were obtained after the battery had been fully charged. Battery electric vehicles require mains electricity for charging. Charging times will depend on various factors, including temperature, state of the battery, state of and capabilities of the charging unit and power supply. Actual charging time will vary depending on the level of charge in the battery, as well as environmental conditions. Charging times will also be affected by the charging curve for example once charging passes 80%, charging will slow to protect the battery's longevity. The availability of the maximum electrical output could be limited. The amount of power available in individual driving situations depends on various factors, such as ambient temperature and the charge status, temperature and condition or physical age of the high-voltage battery. Data correct from 20th December 2025. Choice of wheels and other options may affect consumption and range data. For more information, please see **Škoda.co.uk/owners/wltp-info** or consult your local **Škoda Retailer**.

Information regarding tyre technical specifications can be found by visiting the Škoda car configurator here.
